

The latest enhancement to Miami-Dade County's (MDC) [ePermitting for Contractor's System](#), is now available for use. Roofing contractors can now obtain permits remotely for the installation of selected TPO and PVC membrane roof assemblies. These single ply roofs can be combined with metal roof panels, shingles, or tile roof ePermits as needed to meet job site requirements.

These options all are available for jobs located in un-incorporated MDC. Distance permitting is a valuable option for contractors and helps to avoid the hardships of permitting in person created by the current pandemic.

**0092 LOW SLOPE ROOF - LOW SLOPE ROOF**

Fee Code	Description	Calculation	Units	Total	Minimum Fee
B179	ROOFING LOW SLOPE	0.1 per	SQ FT	0	0
