

## FBC - Shop Drawing Review Check List STORM PROTECTION (SHUTTERS)

Process numbers provided \_\_\_\_\_

Check off each item being included. All 4 items are required. Do not submit if not complete and legible.

- 1. A complete Permit Application (yellow form) with *Category 101 for removable panels or Category 29\* for permanent shutters* a process number; and a total area (sq. ft.) of panels or shutters being installed. (If the shutters are required as part of a “master permit” include that master permit number in the application).

*\*If both removable panels and permanent shutter are to be installed use Category 29*

- 2. Two copies of a plan indicating the size and location of the openings to be protected. And indicating the mean roof height of the building.

- 3. Two complete and legible copies of the Miami-dade County Building Code Compliance, “Notice of Acceptance”\*. If more than one storm panel or method of application is covered on the approval highlight or mark the approval, identifying the panel and connection to be used.

*\* In lieu of Approval for Miami-Dade County Building Code Compliance, “Notice of Acceptance” The product may provide “High Wind Velocity Zone Approval” from the Florida Building Commission*

**Provide two complete sets containing items 2 & 3 (if the permit set is used in lieu of a plan, two copies of item 2 are not required). Items 1 is to be included with the office set.**

MEAN ROOF HEIGHT = 15ft

ACCORDION 72X36  
 +45 psf - 52 psf

Panel 96x96  
 +45 psf - 52 psf

**Note 1.** If tied to a master permit the permit plans may be submitted.

**Note 2:** If more than one type of storm protection is used, identify which product is used at each opening.

**Note 3:** At least one door or window in the first floor (not including the Garage) in the first floor must remain as a means of egress from inside when all the storm protection is installed.
